Create a Jeopardy Game for the Classroom

Go the following website http://www.edtechnetwork.com/powerpoint.html

Scroll down the page and find the section called **Pre-created PowerPoint Jeopardy Downloads**.

Select one of the following templates to download and use:

- Basic Jeopardy Template
- Jeopardy Template Design 1
- Jeopardy Template Design 2
- Jeopardy Template Design 3
- Jeopardy Template Design 4

When the download starts, click the Open button.

When the file opens, click the Orange Enable button at the top of the page.

Go to the File tab and select Save As.

Give the file your name, and in the Save As type, select PowerPoint Presentation from the top of the list.

Press the Save button and begin working on your Jeopardy Game. You may create any kind of Jeopardy Game as long as it is classroom appropriate. Ones on sports or a subject like Math, Social Studies, Science, or Reading are great topics to select as they can be used in the classroom as a study tool.

As you begin to work on your presentation, there will be some large group instruction that will help you to navigate through the slides and how to dim the buttons once they are used.
